

E3554 Cable Drum Trailer

E3554 Cable Drum Trailer

- Heavy Duty drawbar and chassis structure
- 1500kg GVM braked- ideal for tow vehicles with low un-braked towing capacities such as vans and 2WD utes
- Suits cable drums up to 2200mm diameter and 1270mm width
- Maximum load capacity 1200kg
- Dual Cone sets for using 2 drums simultaneously
- Flanged cones to prevent them falling inside the cable drum
- Machine handles for cone collars- no tools required for operation
- Captive Axle Pins- never lose another pin on site!
- Multi-ratio lifting winch for a variety of load weights
- Secondary pivot lock- securing pivot frame to chassis for transport
- Multi-fit safety coupling- fits 1 7/8" and 50mm tow balls safely with no room for operator error
- Minimised pinch points
- Electrical flylead to vehicle - simple to replace if damaged, or simply remove for greater security when not in use
- Spare Wheel
- Protected taillights
- Heavy Duty steps protecting front of mudguards
- Provision for drop-down rear support stands (stands optional extra)
